TECHNICAL SKILLS

Programming Languages
- Java
- C
- PHP

Web Development
- HTML
- CSS
- JS
- React JS
- Spring boot
- Boot strap

Database
- My SQL
- MS SQL
- Mongo DB

Project Management Tools
- ASANA

Operating System
- Linux

Devops
- AWS
- Postman

Profile

A highly motivated IT undergraduate dedicated to improving technical expertise and problem-solving skills for impactful solutions. As a responsible team player with solid leadership qualities and strong team spirit, I confidently contribute to projects. Through the projects, I've enhanced adaptability to new technologies. I am looking for a software engineering internship to apply and refine my skills.

Education

University Of Moratuwa
B.Sc (Hons) in Information Technology & Management
2024 - 2026
CGPA-3.24 (Upto L2S1)

Baduriya National School
G.C.E Advanced Level-Physical Science Stream
Chemistry - A | Mathematics - B | Physics - C

Projects

**Arctic Management System
(Team Leader)**
Developing a CMS as internal web application for control all the raw data about the company .Through web application, this system manage the job activities that helps to resolve the customer problems in using the company's products by this company's services reach those in need .It play a vital role in providing support employees stay up-to-date with their company.

Through web application, this system manage the room booking that helps to book the room via online by this hotel services reach those in need with many advanced features. It play a vital role in providing support customers stay up-to-date.

Technologies: React JS, MySQL, Spring boot, Material UI

○ **GitHub Link**   **Role: Full Stack Developer**

Portfolio

Create at responsive web application .This helps to identifying more about me.

Technologies: React JS, Material UI, Spring boot

 GITHub Link

Hardware Project Adjustable P10 LED Display Controller

Built a controller that has the feature to display text on a P10 LED display via WIFI, Ethernet, and SD card using ESP32 Microcontroller. The user can adjust the number of LED displays and the correctors what ever they want .Through the controller, can change the font family and the speed of the text using the keypad. This helps customers to make display text in P10 LED Display according to customer choice by them self.

Technologies: C language, Atmel Studio, Proteus Simulation, Blender, EasyEDA

Achievements & Participations

- MoraXtreme 7.0 - Participent
- MoraXtreme 8.0 - Participent

Roles & Responsibilities

- **Member of UGSM (Undergraduate Society Mawanella)**
- **IEEE University Of Moratuwa**
  - Student Branch Member
  - Editorial Team Member - MoraForesight 1.0
  - Editorial Team Member - NFB
  - Editorial Team Member - IAS Chapter
- **Member of Leo Club**
- **Member of Rotract Club**
- **FIT Future Careers 2024**
  - Editorial Team Member
- **Member of FIT Future Careers 2023**
